Nexus Technologies - General Remote Work & Workplace Guidelines

Nexus Technologies - General Remote Work & Workplace Guidelines

SECTION 1: GENERAL FLEXIBLE WORK PRINCIPLES

Nexus supports flexible work arrangements that balance individual autonomy with team collaboration. All eligible employees may participate in our hybrid working rhythm, coordinating with team leaders to establish collaborative anchor days.

SECTION 2: WORKSPACE SETUP AND ERGONOMIC HEALTH

Remote employees are expected to maintain a dedicated, distraction-free workspace. Workstations should feature adequate lighting, stable high-speed broadband connection (>50 Mbps download / 15 Mbps upload), and an ergonomically sound chair and desk arrangement. Employees should take regular 5-minute screen breaks every hour.

SECTION 3: COMMUNICATION STANDARDS AND CORE HOURS

To facilitate seamless collaboration across distributed teams, core working hours are established between 10:00 AM and 4:00 PM in the employee’s local time zone. Slack status should be kept current, and calendar availability should be maintained in Google Calendar.

SECTION 4: WORKSTATION SECURITY ESSENTIALS

Corporate laptops must remain secured at all times. Screens must be locked immediately whenever stepping away from the device. Under no circumstances may family members or guests access corporate-issued hardware.
