# Nexus Technologies - Corporate Records Retention and Destruction Policy

# Nexus Technologies - Corporate Records Retention and Destruction Policy

## SECTION 1: PURPOSE AND CLASSIFICATION SCHEDULE

This policy establishes mandatory retention schedules for corporate records in accordance with statutory, regulatory, and operational requirements. Records are classified into the following retention periods:

- Financial & Tax Documents: 7 years from tax filing date (audits, ledgers, tax returns).

- Executed Contracts & Agreements: 10 years following expiration or formal termination.

- Employee & Personnel Records: 7 years following date of employee separation.

- Technical Logs & Audit Trails: 1 year in active queryable storage; 3 years in cold archival.

- Corporate Governance & Board Minutes: Permanent retention in corporate legal archives.

## SECTION 2: LITIGATION HOLD PROCEDURES

Upon reasonable anticipation of litigation, regulatory subpoena, or government investigation, the General Counsel issues an immediate 'Litigation Hold' notice. All routine disposal and automated data deletion routines for relevant documents are immediately suspended until the hold is formally rescinded in writing.

## SECTION 3: SECURE DESTRUCTION STANDARDS

When records reach the end of their retention lifecycle, electronic media must be sanitized in compliance with NIST SP 800-88 Guidelines for Media Sanitization (cryptographic erasure or physical destruction).
