Nexus Technologies - Cloud Infrastructure Regulatory Compliance Manual

Nexus Technologies - Cloud Infrastructure Regulatory Compliance Manual

SECTION 1: SOC 1 AND SOC 2 TYPE II ATTESTATION

Nexus completes annual independent SOC 1 and SOC 2 Type II examinations conducted by a licensed CPA firm. Attestation reports evaluate system controls against AICPA Trust Services Criteria: Security, Availability, Processing Integrity, Confidentiality, and Privacy over a minimum 6-month testing window.

SECTION 2: ISO/IEC 27001:2022 CERTIFICATION

The Information Security Management System (ISMS) governing Nexus infrastructure is certified under ISO/IEC 27001:2022. Security controls encompass cryptography, access management, vulnerability patching, physical perimeter controls, and incident management.

SECTION 3: HIPAA COMPLIANCE FOR HEALTHCARE DATA

When processing Protected Health Information (PHI) on behalf of covered entities, Nexus executes formal Business Associate Agreements (BAAs). PHI is protected through dedicated VPC isolation, AES-256 encryption at rest, TLS 1.3 in transit, and immutable audit logging.

SECTION 4: PCI-DSS PAYMENT SECURITY

Nexus utilizes PCI-DSS Level 1 certified payment processors (Stripe) for credit card transactions, ensuring zero cardholder data touches or resides on Nexus application servers.
